Fires are happening in your community!

What you need to know about fires in Ajax:

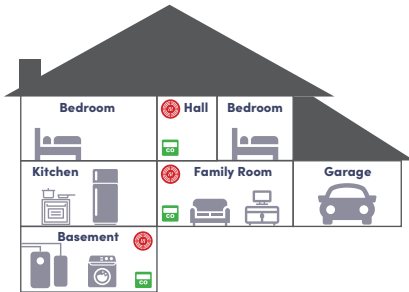

The number one cause of fires and fire-related injuries in the house is careless cooking. Stay in the kitchen while you cook!

Protect your family from fire

1. Install and maintain smoke alarms and carbon monoxide alarms

- Install smoke alarms and carbon monoxide alarms on every level of your home, and outside of every sleeping area.
- Test smoke alarms once a month.
- **Replace all smoke alarms that are over 10 years old. Replace carbon monoxide alarms every 5-7 years following manufacturer instructions.**

2. Prepare and practise your home fire escape plan

Remember: Never re-enter a burning building. Once you have safely escaped, call 9-1-1 from outside.
